ASTRA functional testing report

15 October 2026 | Desktop Chromium | 1440 x 1000 viewport

Target: https://astra.52.206.45.195.sslip.io

Authenticated smoke checks covered 46 routes, including 12 incident detail pages. No HTTP 4xx/5xx responses were captured during these short observation windows. This is partial functional coverage, not a complete end-to-end certification.

No records were deleted. No performance/load tests were run. No valid create or update submission was made. Credentials and authentication state are excluded from this report.

Results and limitations

Sign-in with the supplied account succeeded. Navigation screenshots and route-level observations are included below. A page rendering successfully does not establish that all its controls, data, permissions, or backend operations are correct.

No confirmed application defect has been established by the completed checks. Displayed incident failures and application logs describe monitored systems and are not, by themselves, defects in ASTRA.

Empty name disables submission: {"result": true}

Empty dashboard name: {"result": {"valid": false, "message": "Please fill out this field."}}

Cancel form: {"result": true}

Escape closes Apps: {"search_visible": false}

Apps unmatched search correctly displayed a no-match message. Escape closed the Apps menu. The dashboard rendered its populated content in the follow-up check.

Potential observations requiring confirmation

OBS-01 (resolved on follow-up): The first /dashboards capture showed “Loading dashboard” after a short wait. The follow-up capture after a longer wait showed populated dashboard content. No persistent loading defect was reproduced; this was not a performance measurement.

OBS-02: An early dashboard creation-form capture showed no saved dashboards and only the all-accounts option while a separate settled management-page capture showed an existing dashboard. Initial data loading is a possible explanation; persistence and reproduction must be verified before filing a bug.

Coverage excluded or incomplete: record creation/edit persistence/deletion, performance, cross-browser/mobile, role-based access, security testing, integration writes, remediation approvals, report exports, and exhaustive validation of every form. Security, Unit Economics, Integrations and Administration submenus were not exhaustively traversed.

Test each flow one by one

1. Sign in: open the application, enter the authorized account, submit, and confirm the landing page. Result: passed for the supplied account.

2. Navigation: open each route listed in the evidence appendix. Confirm the correct page and inspect visible errors. Result: smoke checked; screenshots captured.

3. Dashboard form: Manage dashboards > New dashboard. Leave Name empty; inspect the disabled submit control and required field. Cancel and confirm the form closes. Do not submit valid data unless a controlled test record is intended.

4. Apps: open Apps, search for a known page, search for an unmatched term, clear the search, and check Escape/close behavior. Completed checks are recorded in the results section.

5. Incidents: open the list and a record; compare IDs, status and details. Twelve detail routes were opened. Remediation and approval actions were not triggered.

6. For each remaining form: check required fields, valid/invalid boundaries, dropdowns, Cancel, error messages, and refresh persistence using approved test records. These are follow-up steps, not completed results.

7. Keep deletion and performance tests excluded as requested.

How to share and close an error

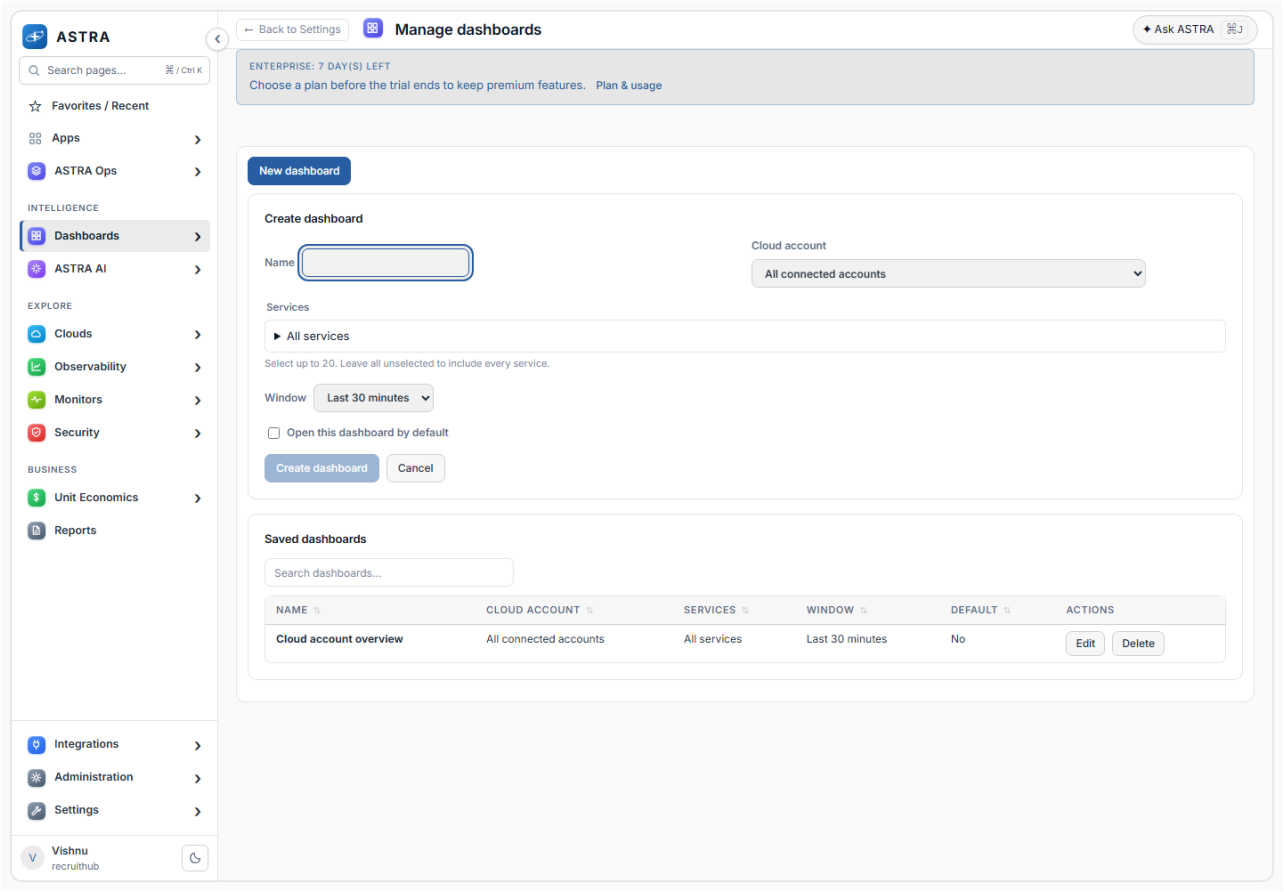

Use one issue per defect: ID; title; module/URL; environment; prerequisites; numbered actions; expected result; actual result; screenshot filename; reproducibility; severity; owner; status. Avoid passwords, tokens and unrelated personal data.

Flow: reproduce > capture evidence > assign severity and owner > developer fixes > rerun the same steps > check nearby behavior > close only if the expected result is verified. Otherwise reopen with fresh evidence. Closing an issue does not mean deleting its evidence or application records.

Example template (not a discovered bug): BUG-001 | [short symptom] | URL [route] | Steps 1...2...3... | Expected [...] | Actual [...] | Screenshot [...] | Severity [...] | Status Open.

/home

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/ops

Evidence: 02-home.png

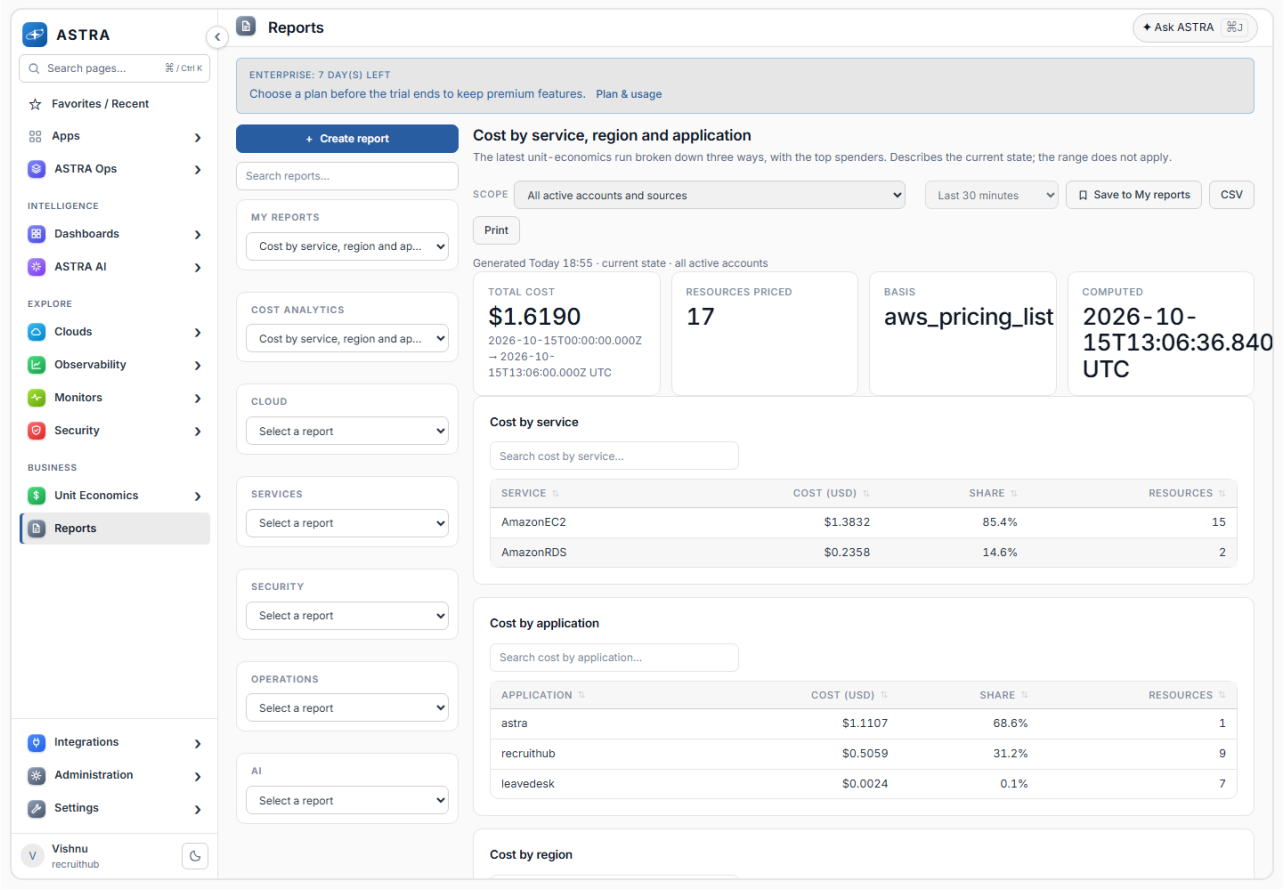

/reports

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/reports?r=cost

Evidence: 03-reports.png

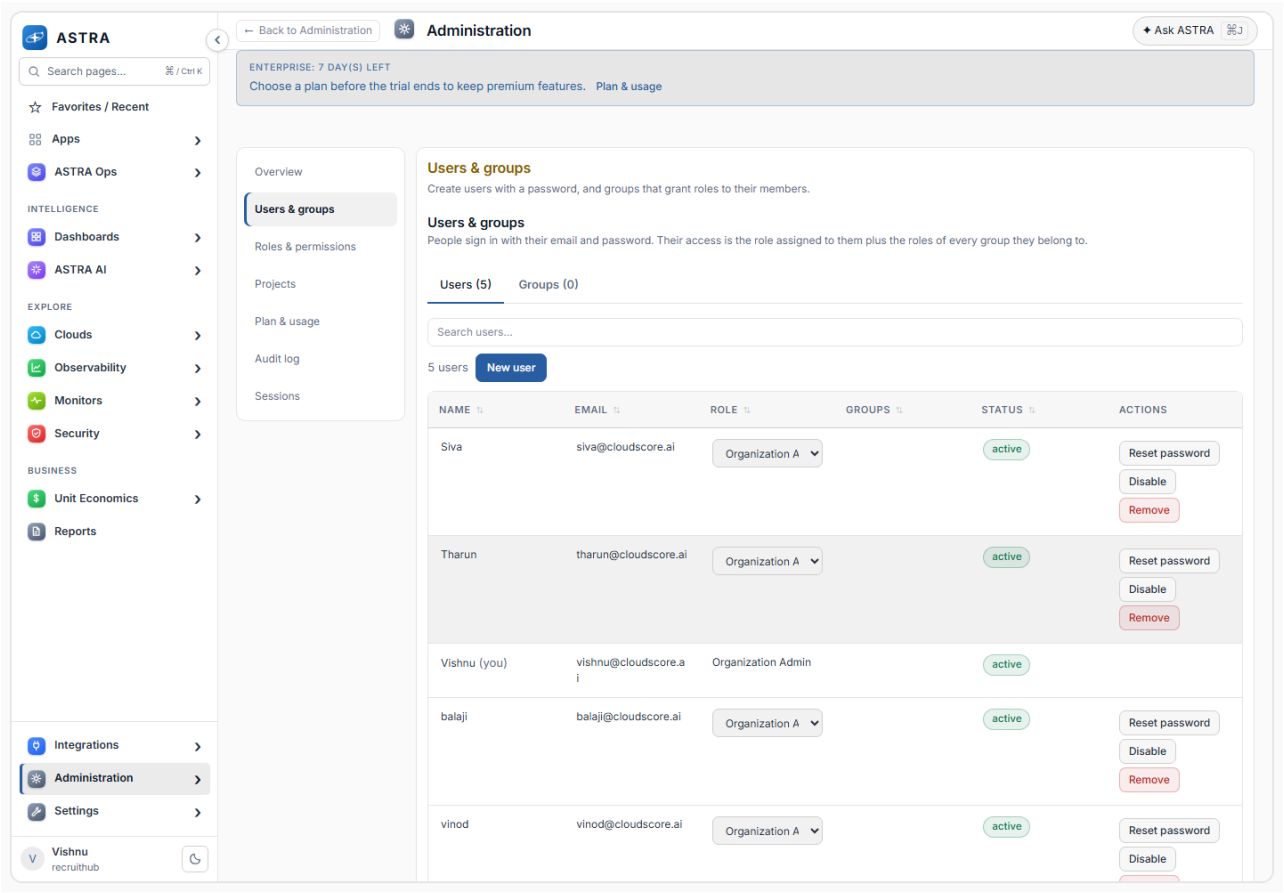

/manage/org/organizations

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/manage/org/organizations

Evidence: 04-manage-org-organizations.png

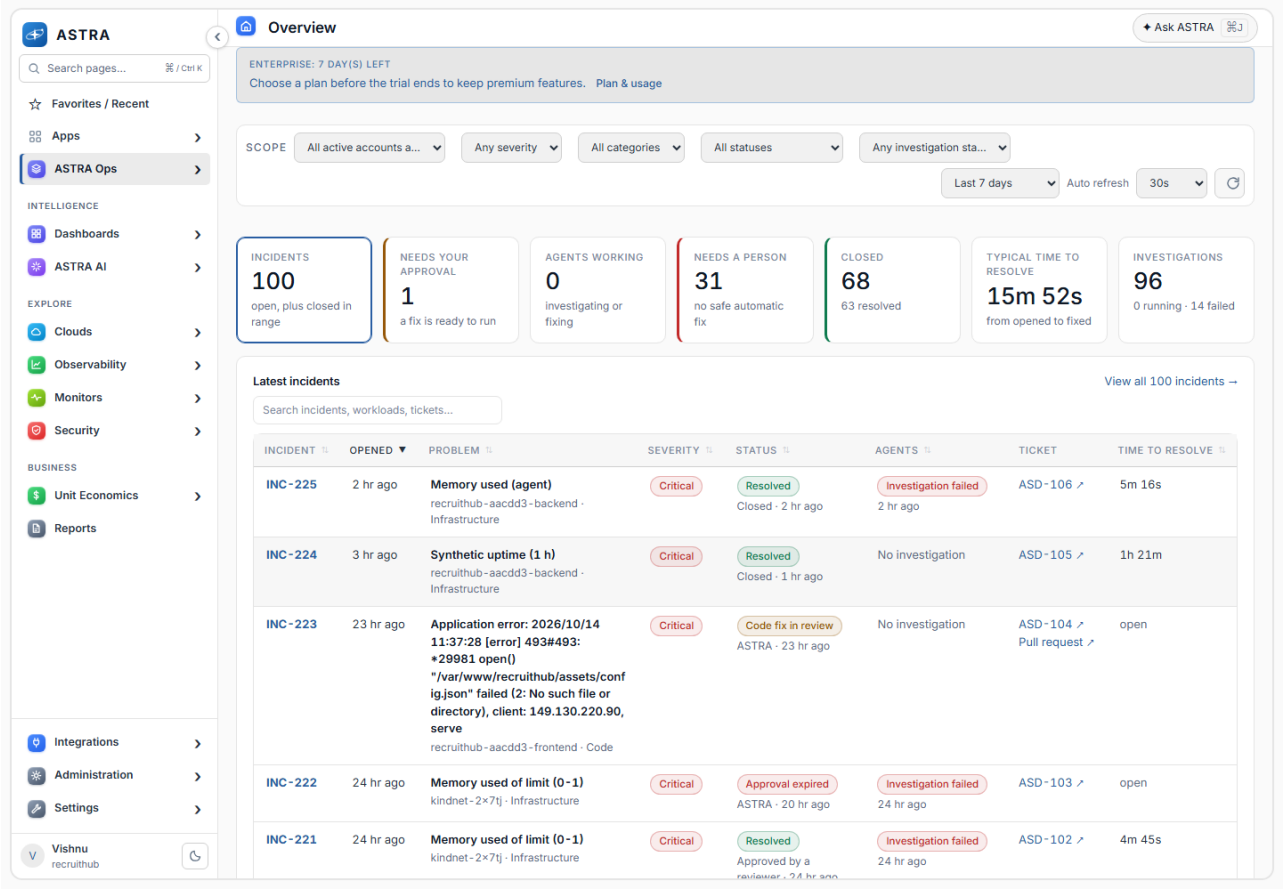

/ops

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/ops

Evidence: 05-ops.png

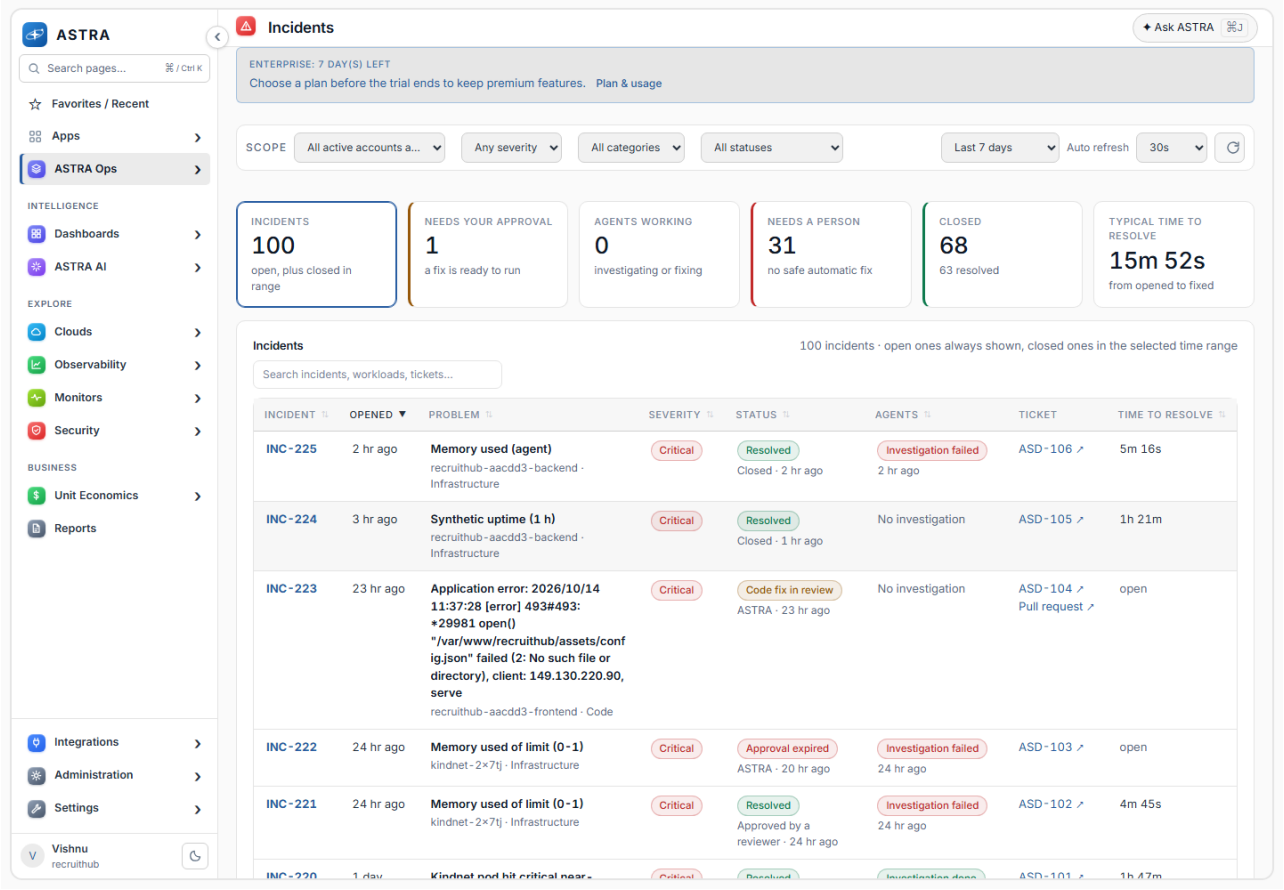

/incidents

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/incidents

Evidence: 06-incidents.png

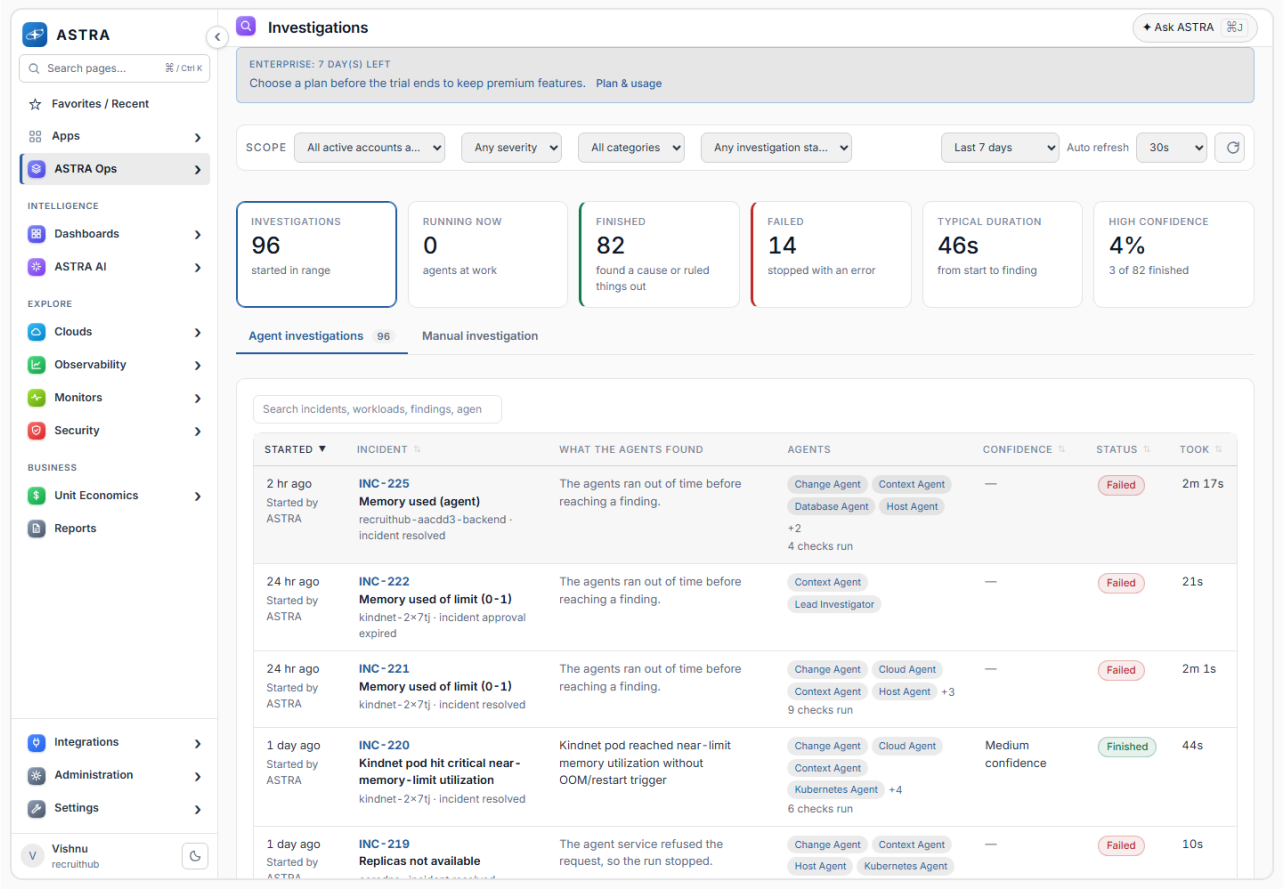

/investigations

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/investigations

Evidence: 07-investigations.png

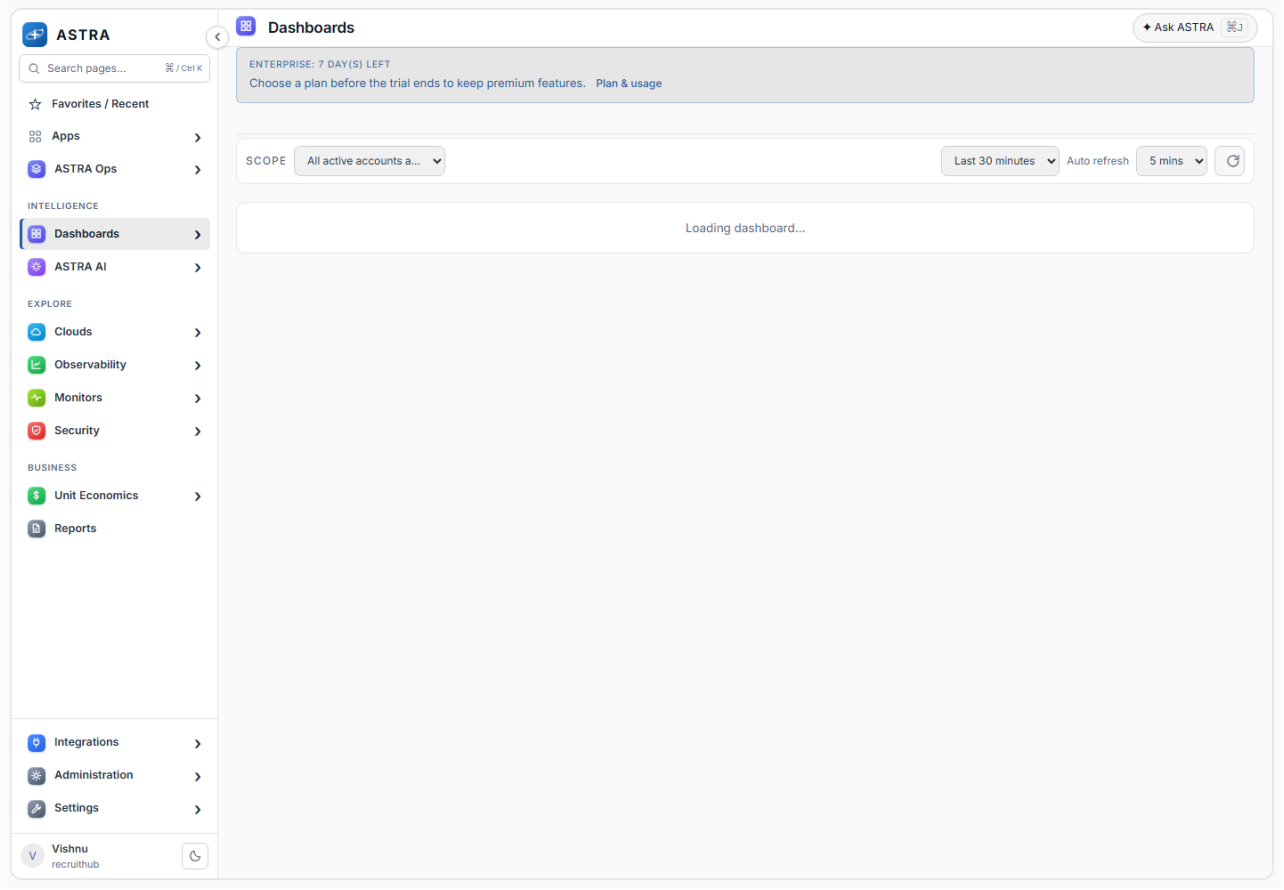

/dashboards

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/dashboards

Evidence: 08-dashboards.png

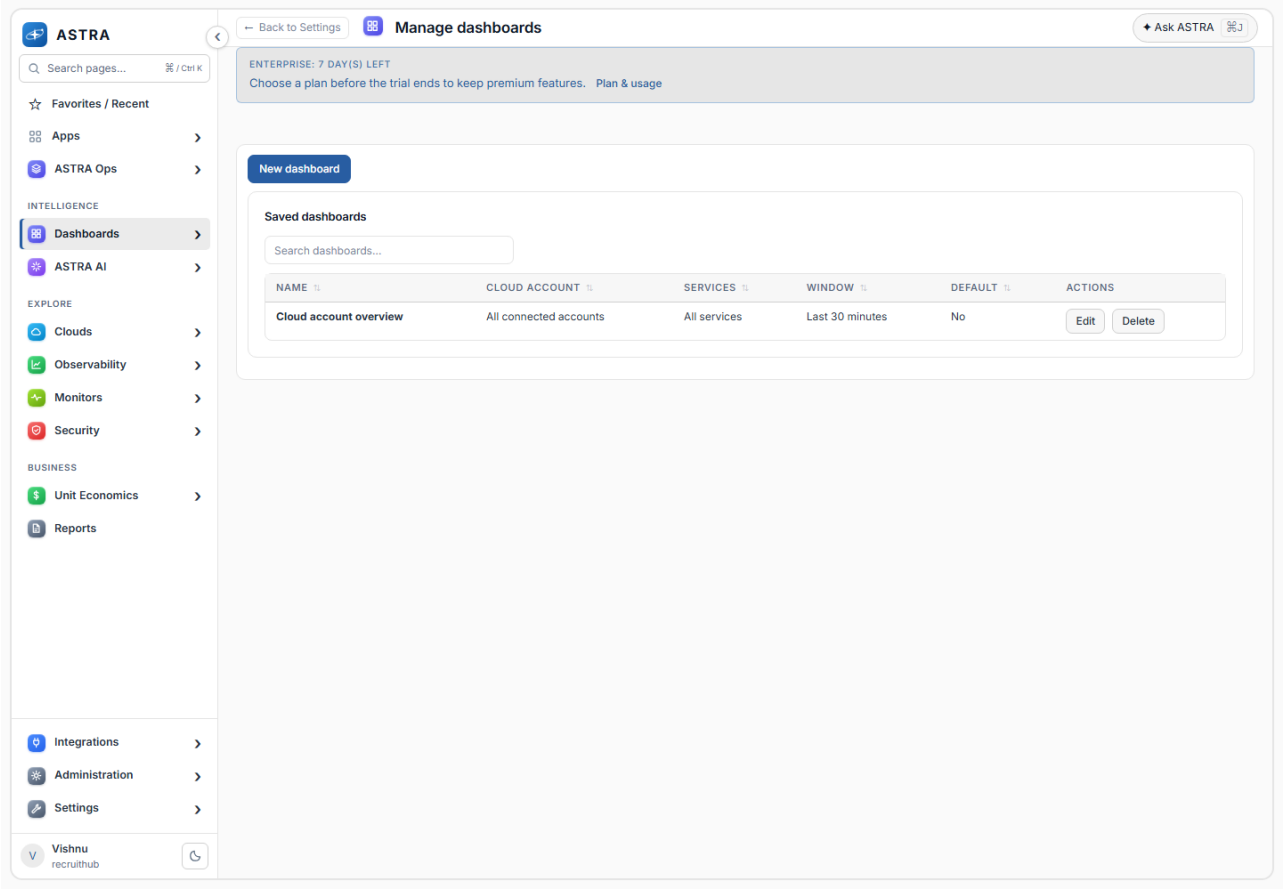

/manage/settings/dashboards

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/manage/settings/dashboards

Evidence: 09-manage-settings-dashboards.png

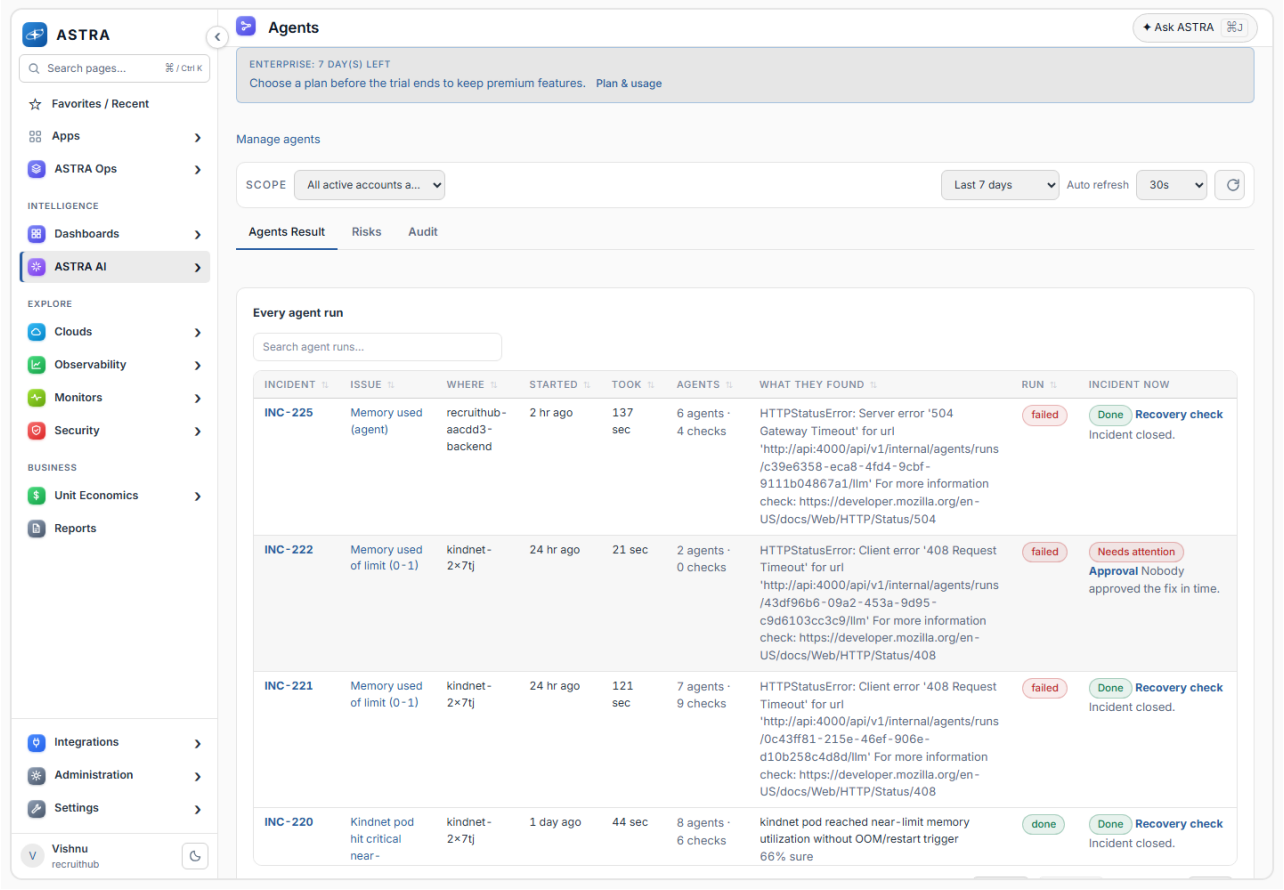

/astra/agents

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/astra/agents

Evidence: 10-astra-agents.png

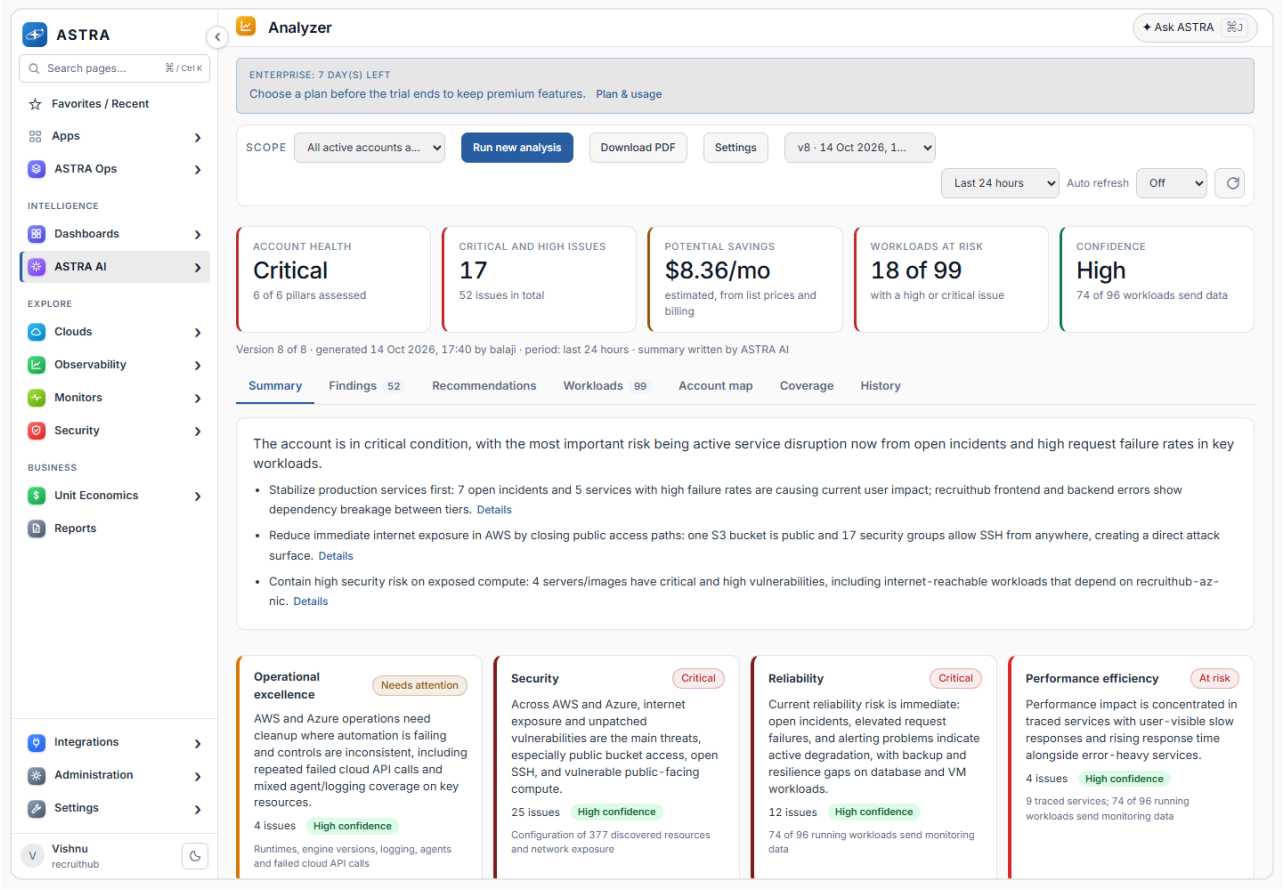

/astra/analyzer

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/astra/analyzer

Evidence: 11-astra-analyzer.png

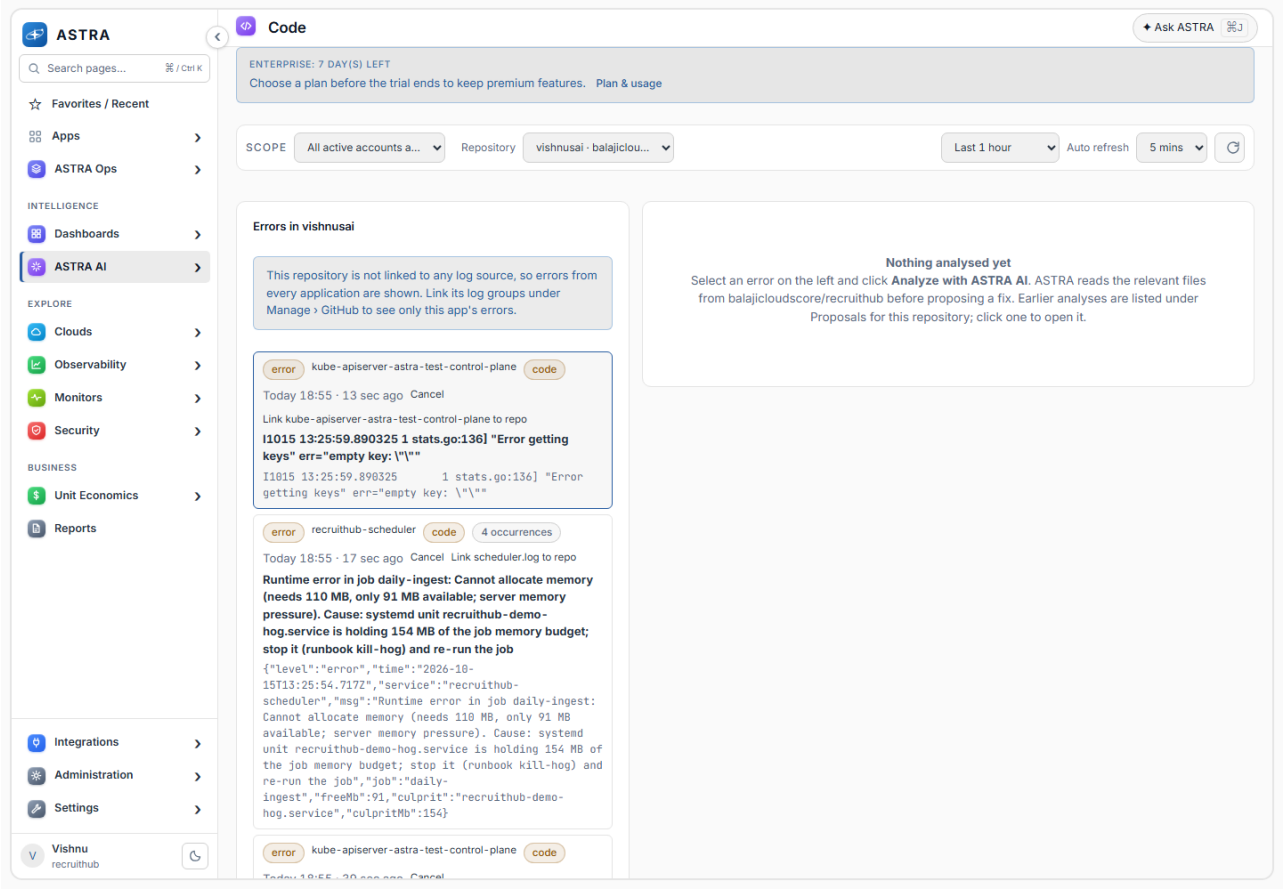

/astra/code

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/astra/code

Evidence: 12-astra-code.png

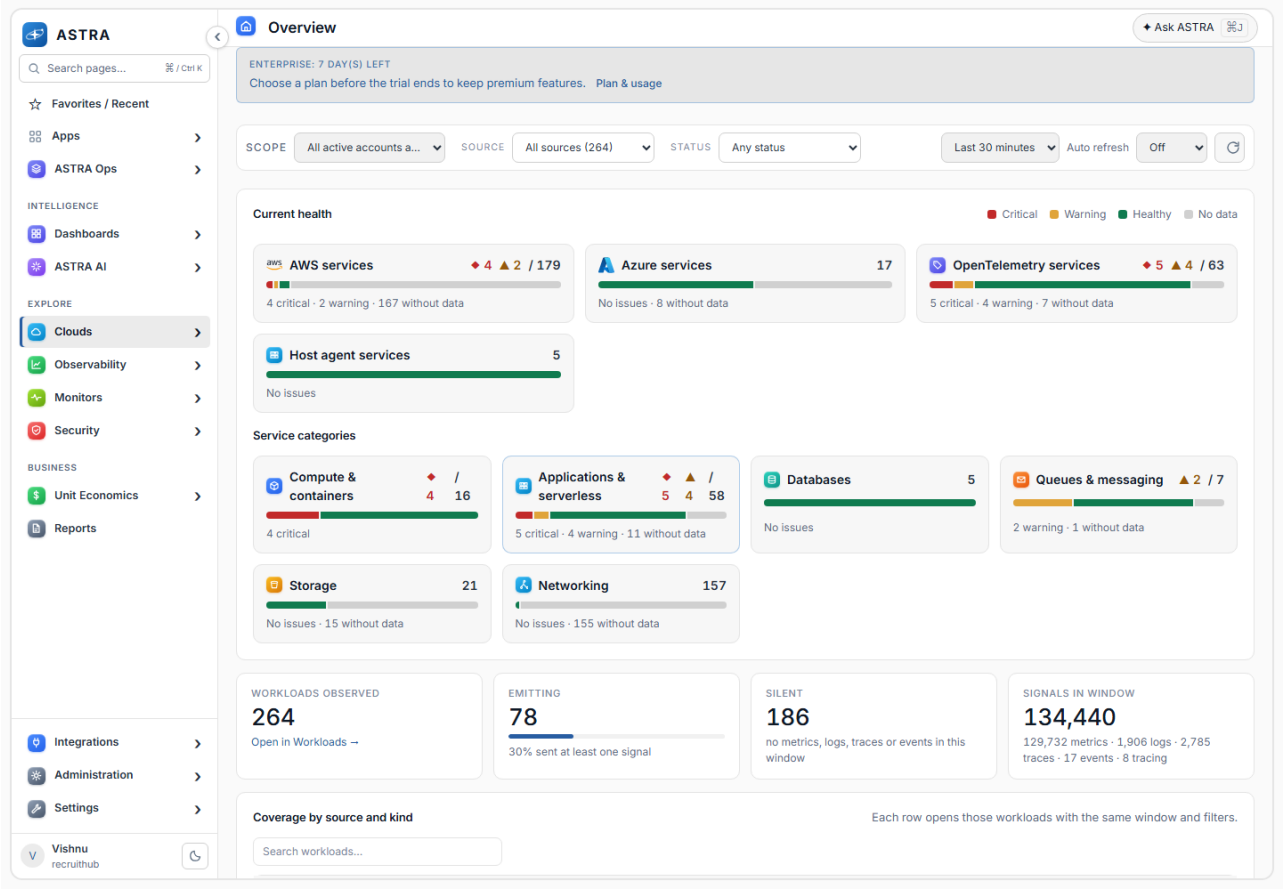

/observe

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/observe

Evidence: 13-observe.png

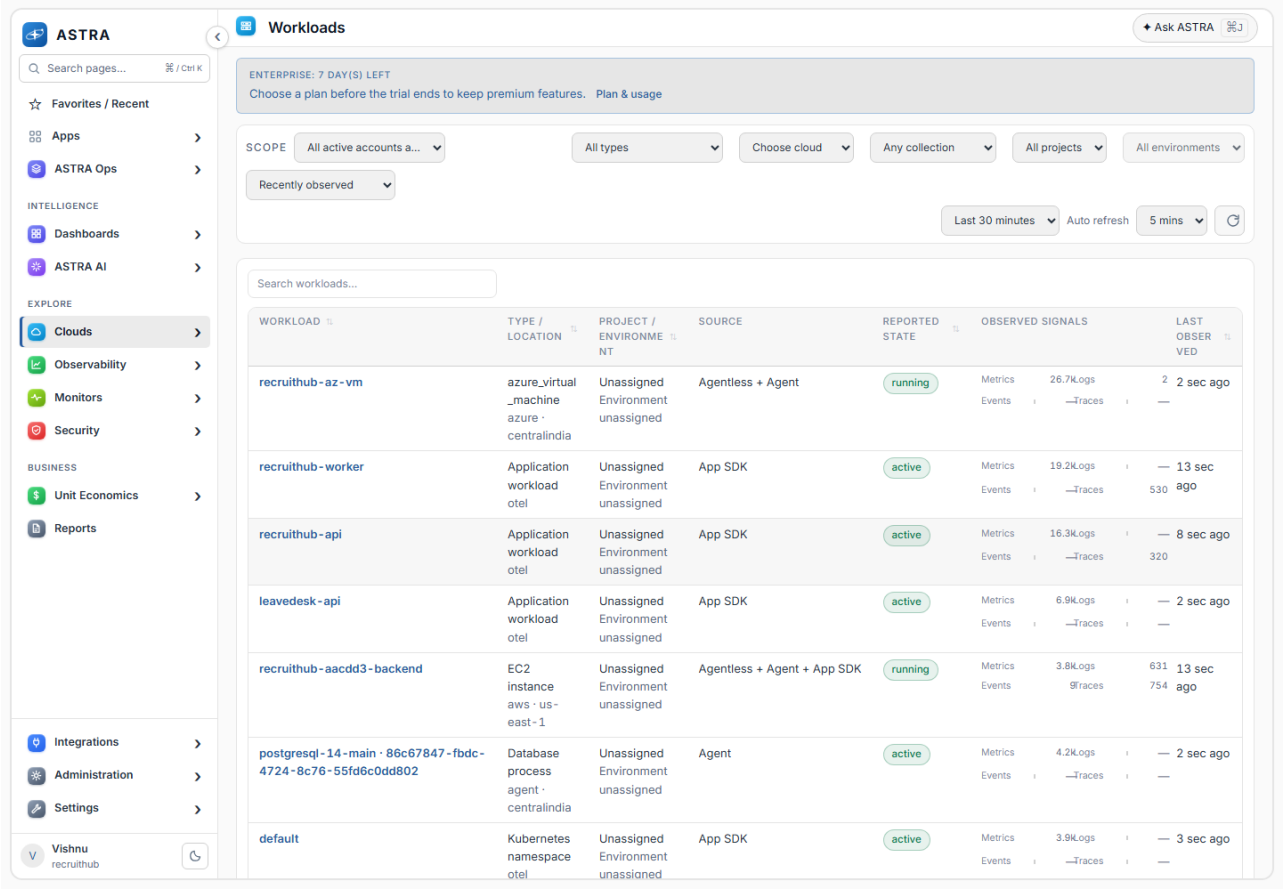

/observe/workloads

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/observe/workloads

Evidence: 14-observe-workloads.png

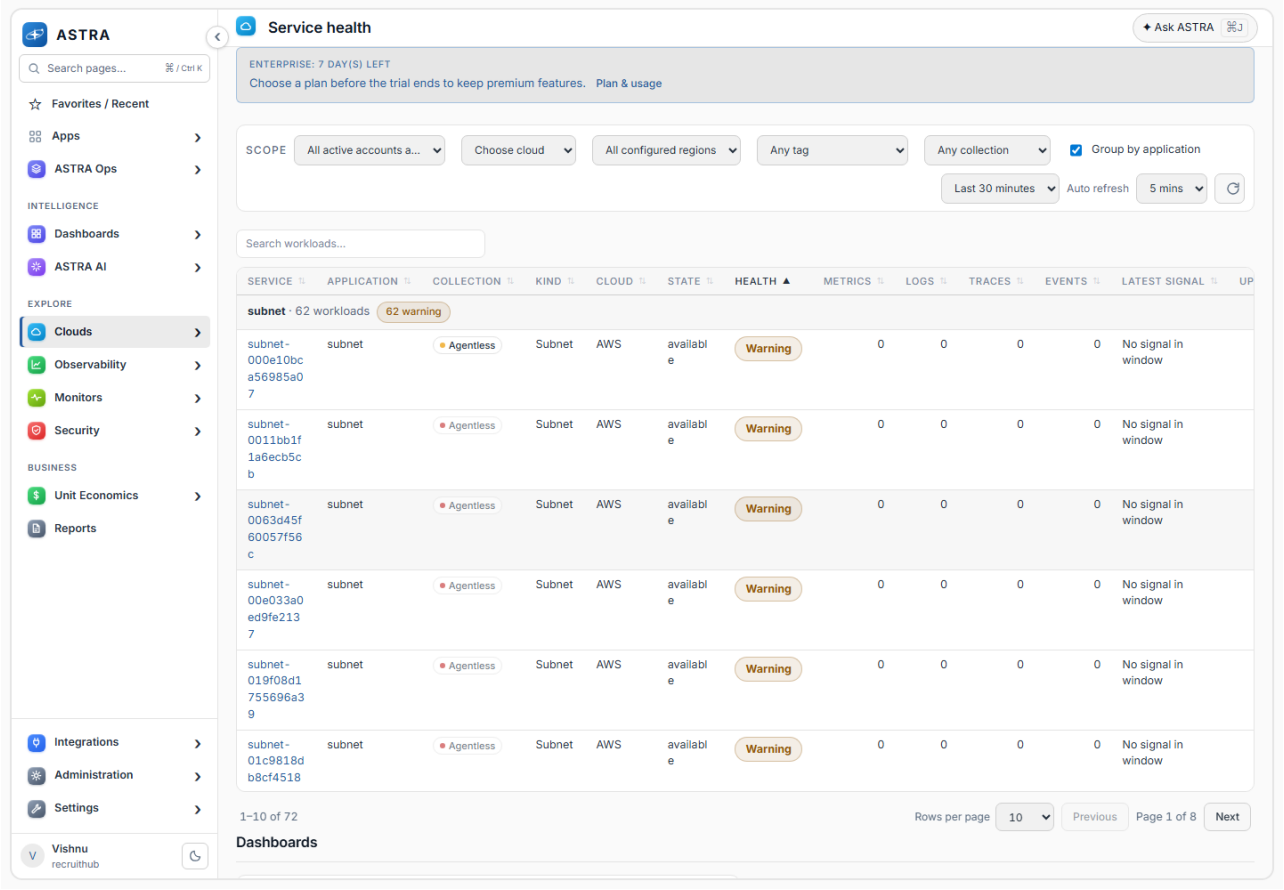

/infrastructure/service-health

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/infrastructure/service-health

Evidence: 15-infrastructure-service-health.png

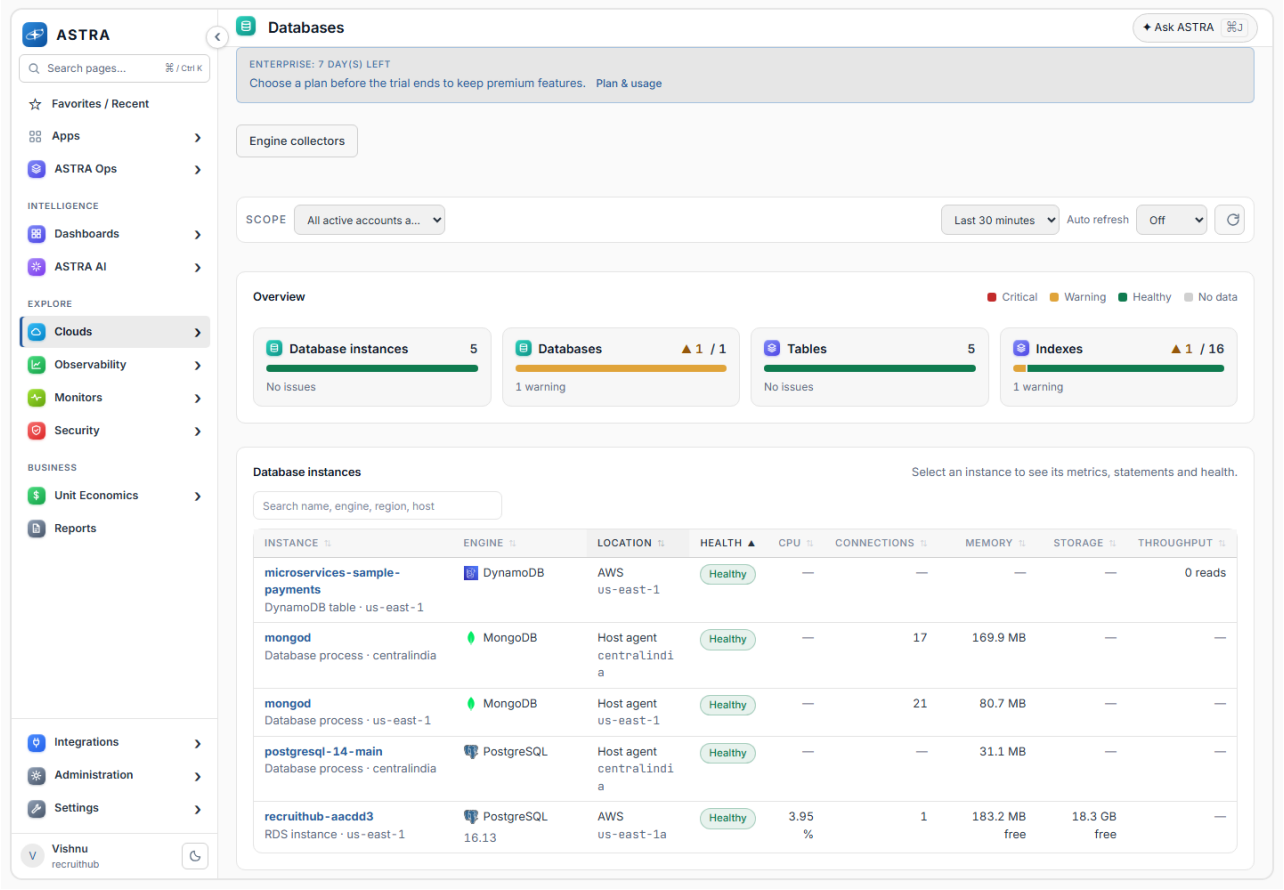

/infrastructure/databases

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/infrastructure/databases

Evidence: 16-infrastructure-databases.png

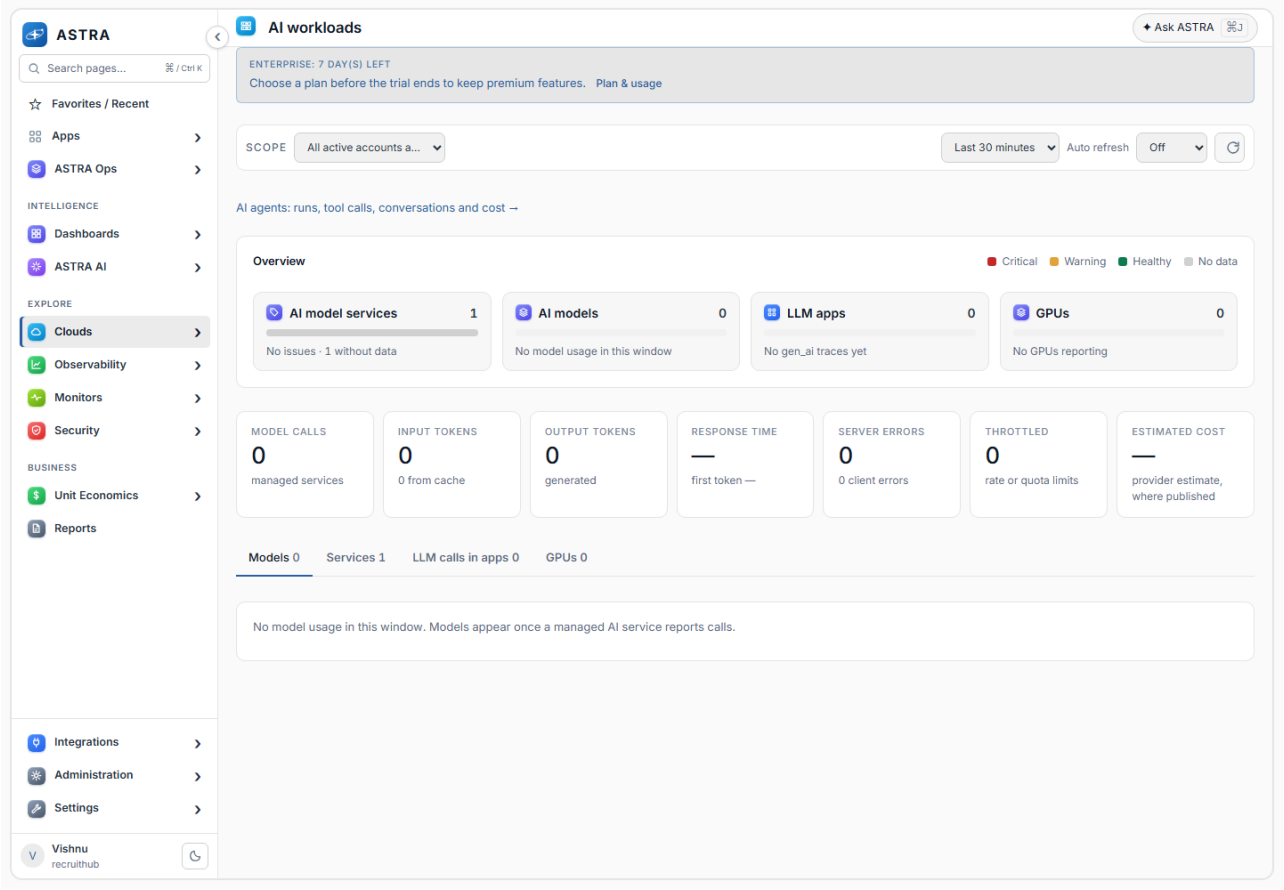

/infrastructure/ai

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/infrastructure/ai

Evidence: 17-infrastructure-ai.png

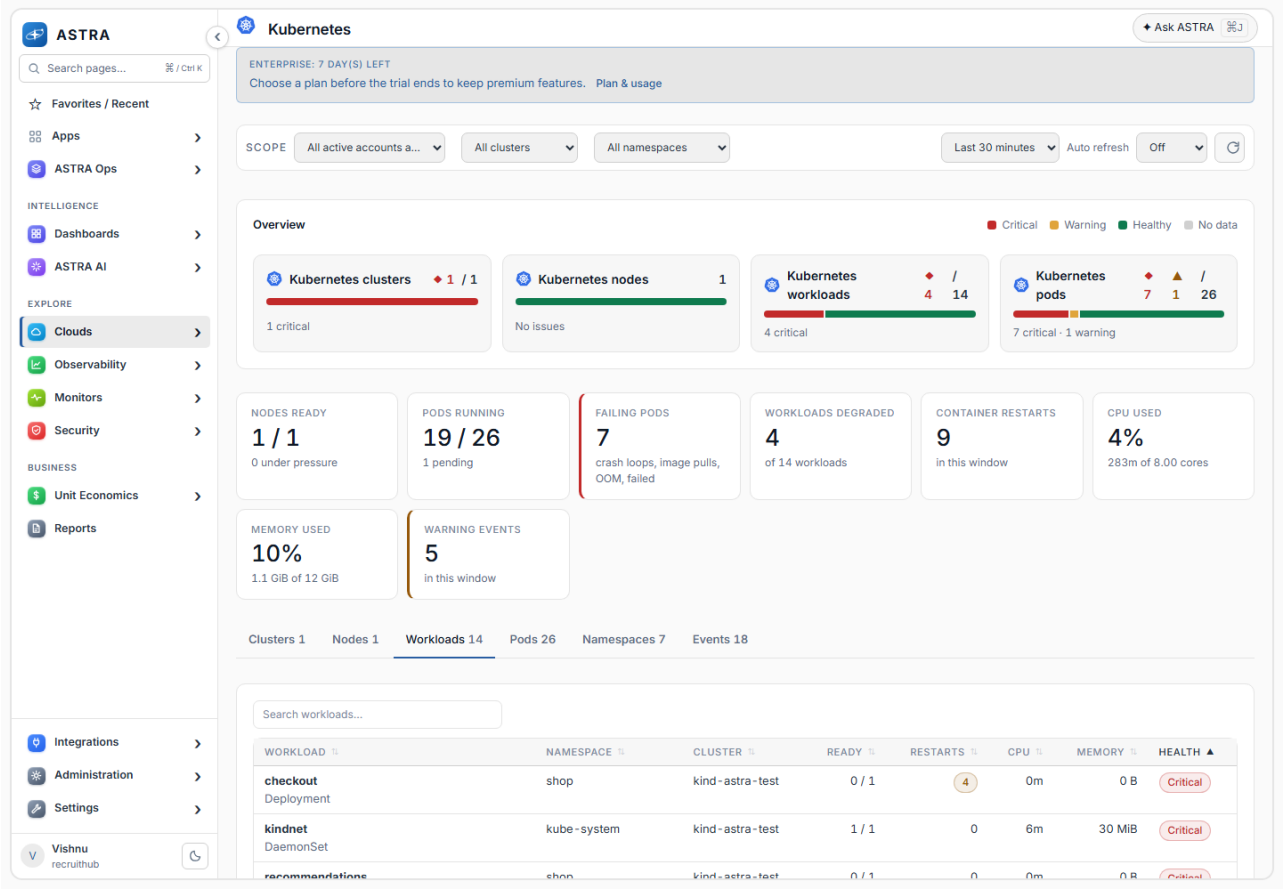

/infrastructure/kubernetes

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/infrastructure/kubernetes

Evidence: 18-infrastructure-kubernetes.png

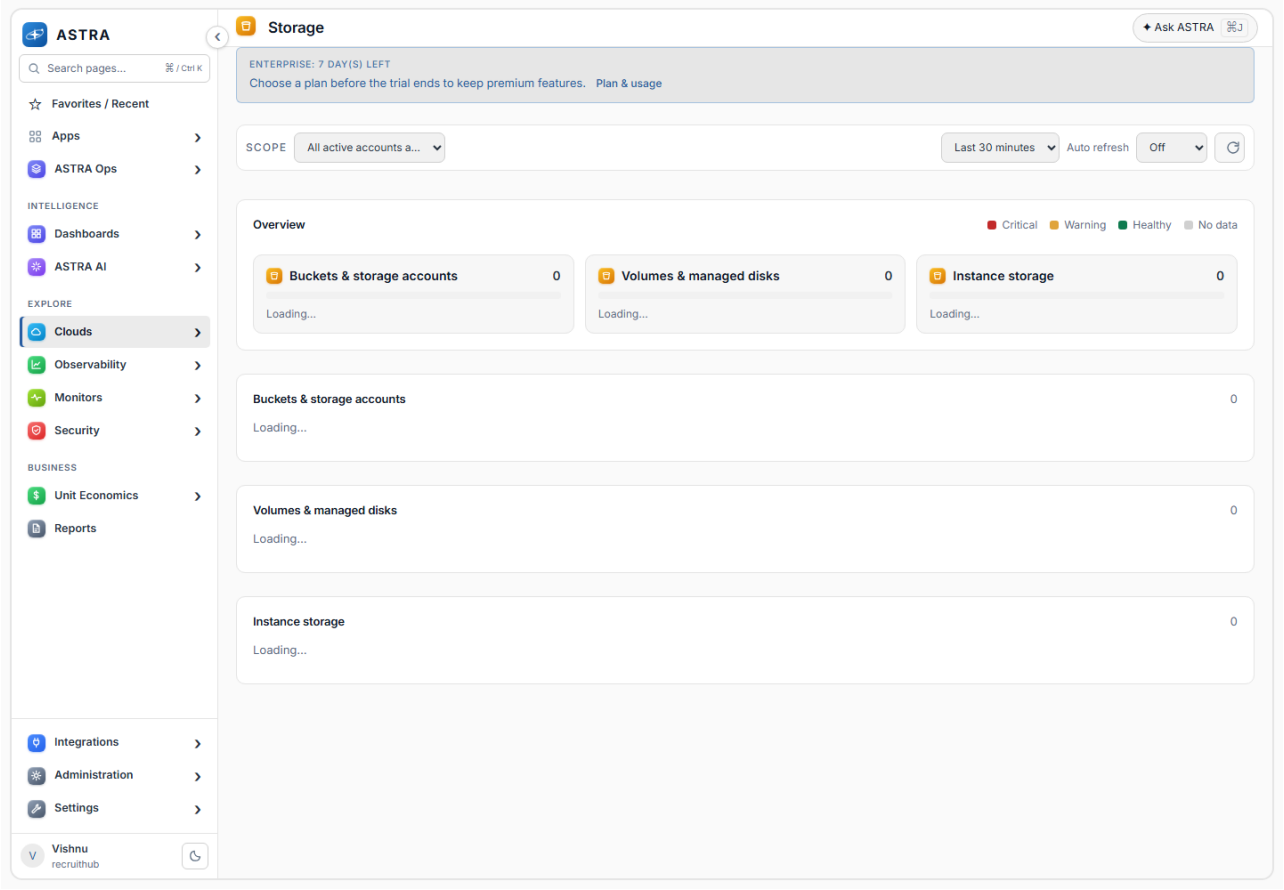

/infrastructure/storage

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/infrastructure/storage

Evidence: 19-infrastructure-storage.png

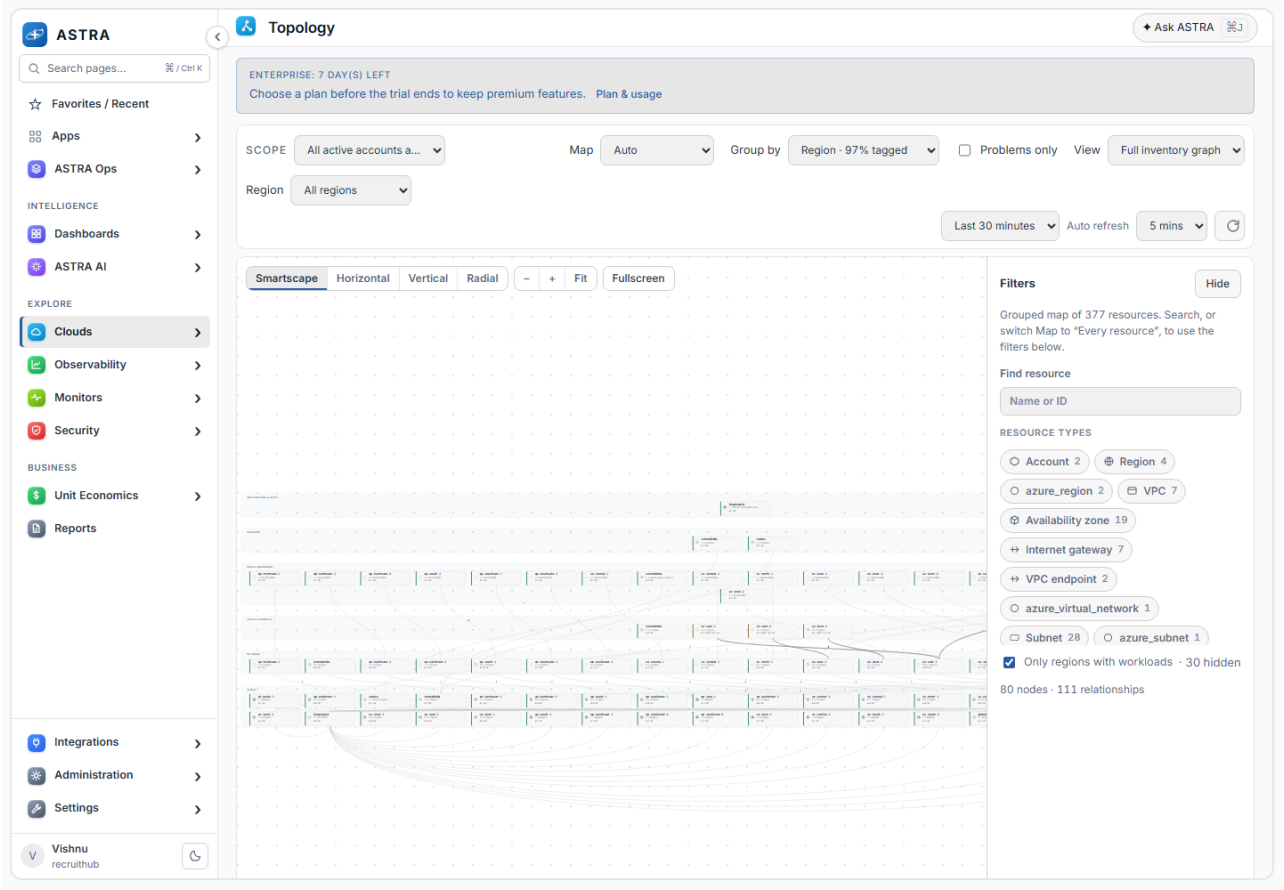

/infrastructure/topology

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/infrastructure/topology

Evidence: 20-infrastructure-topology.png

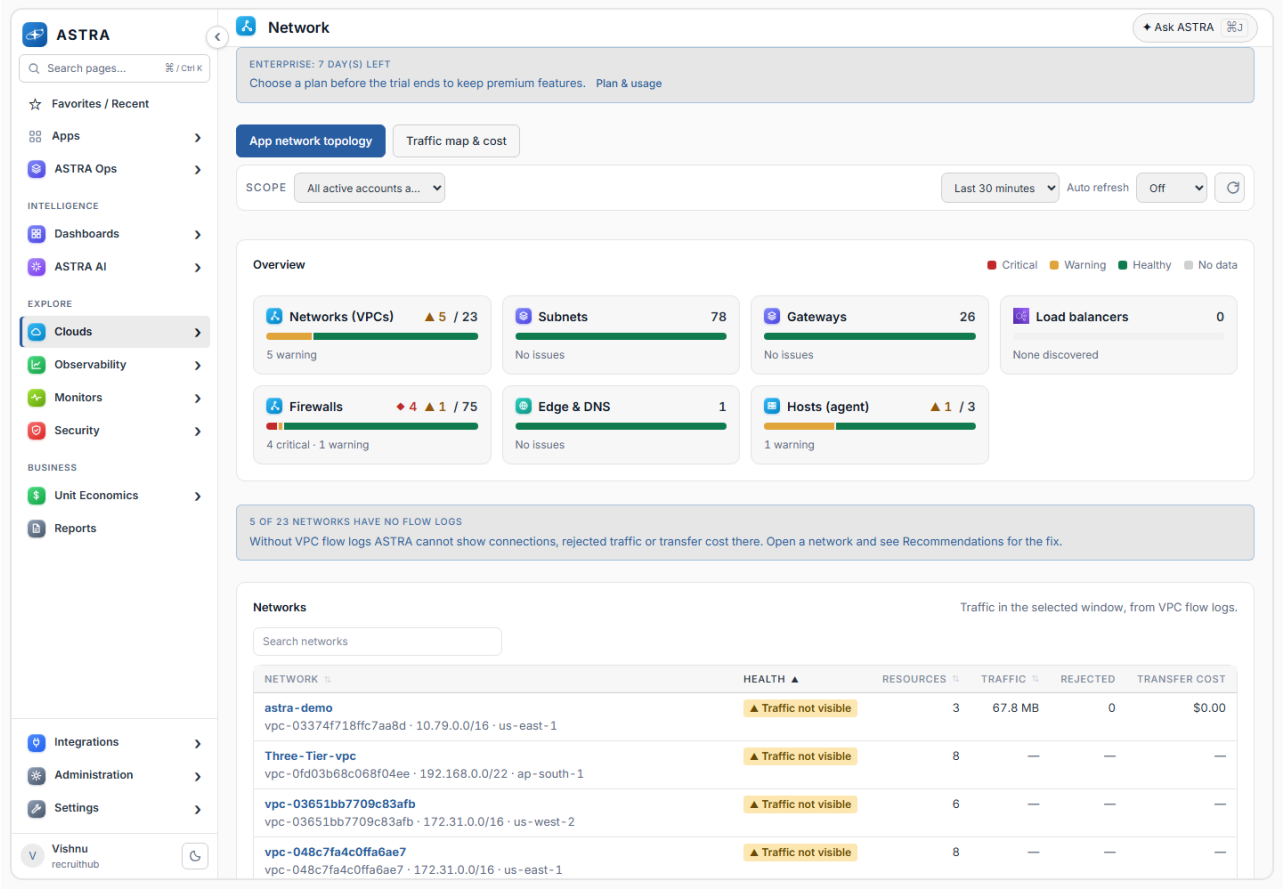

/infrastructure/network

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/infrastructure/network

Evidence: 21-infrastructure-network.png

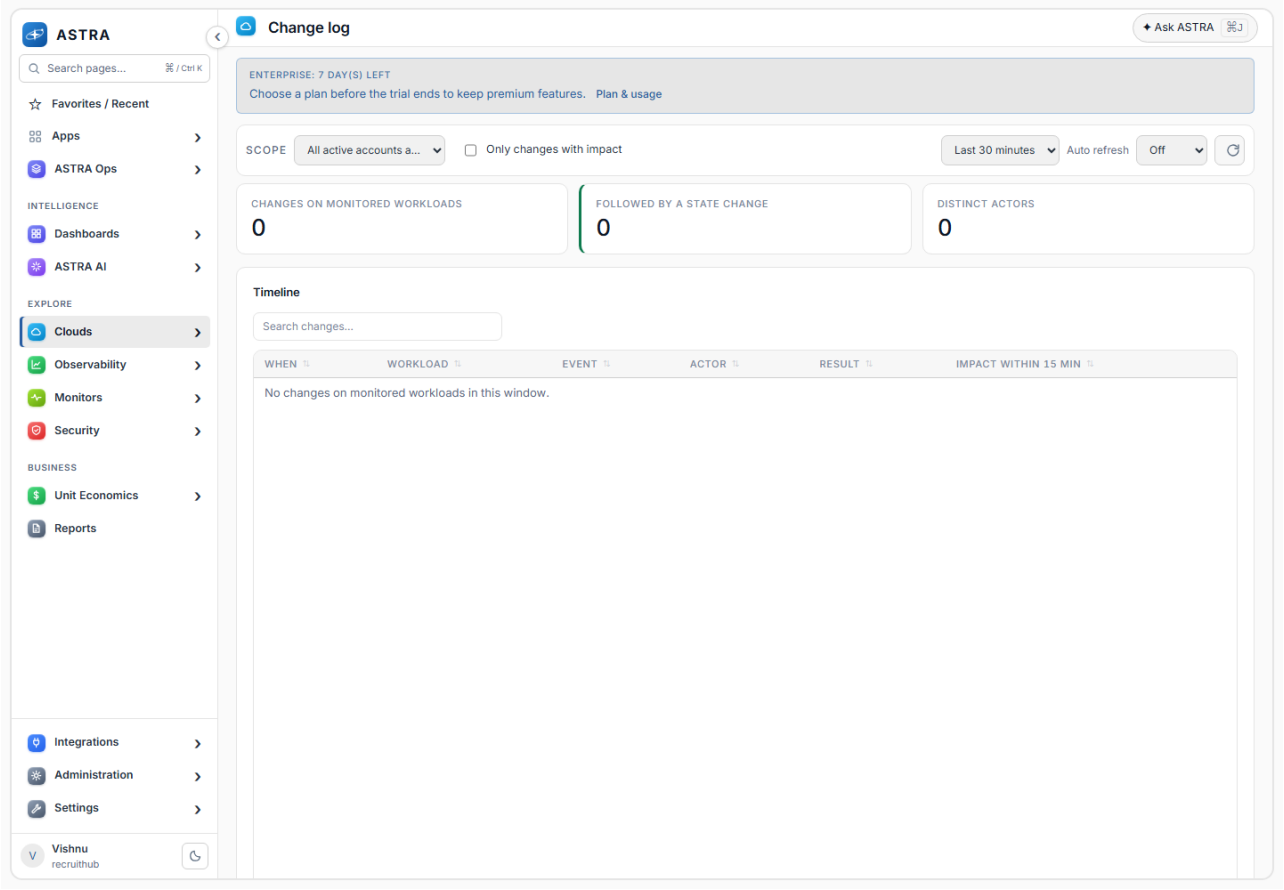

/infrastructure/changes

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/infrastructure/changes

Evidence: 22-infrastructure-changes.png

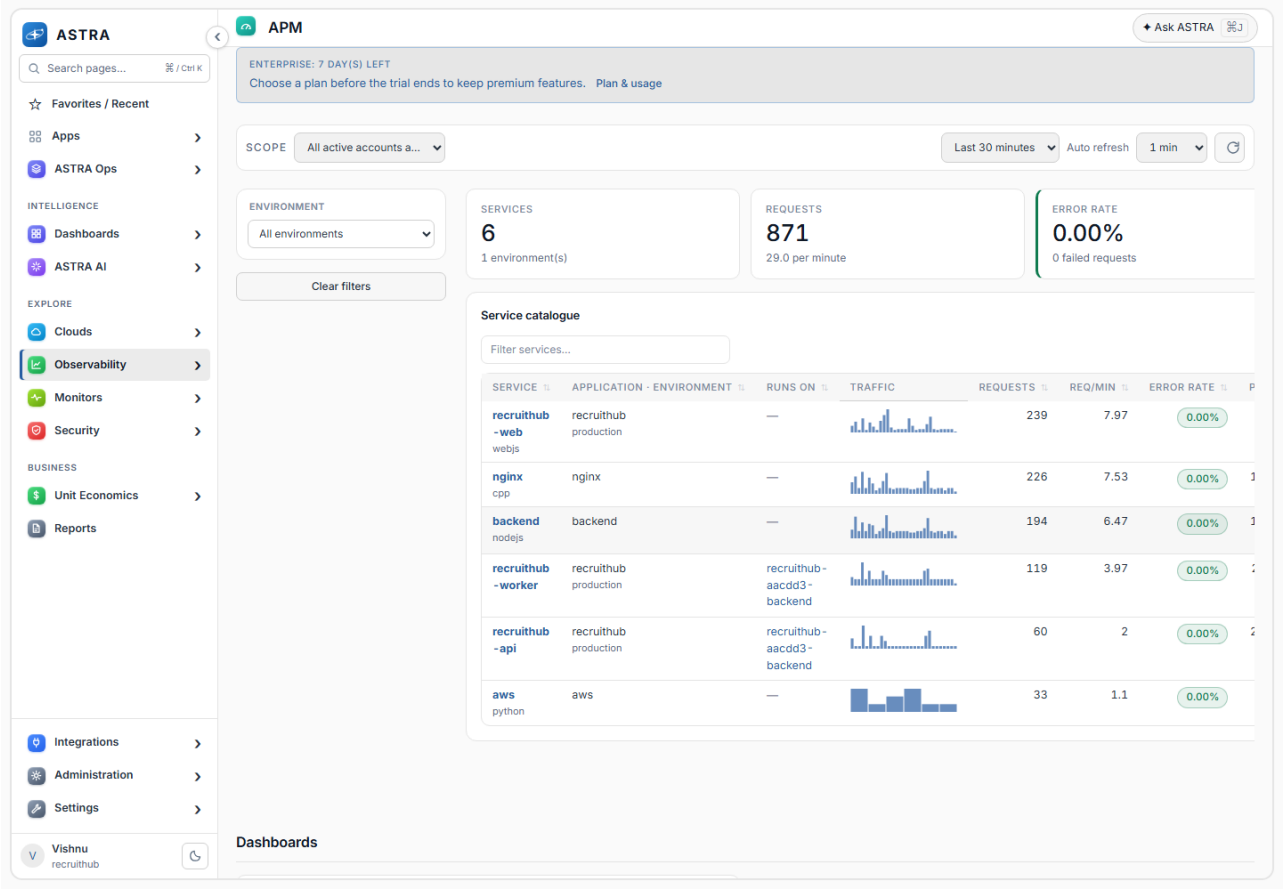

/apm

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/apm

Evidence: 23-apm.png

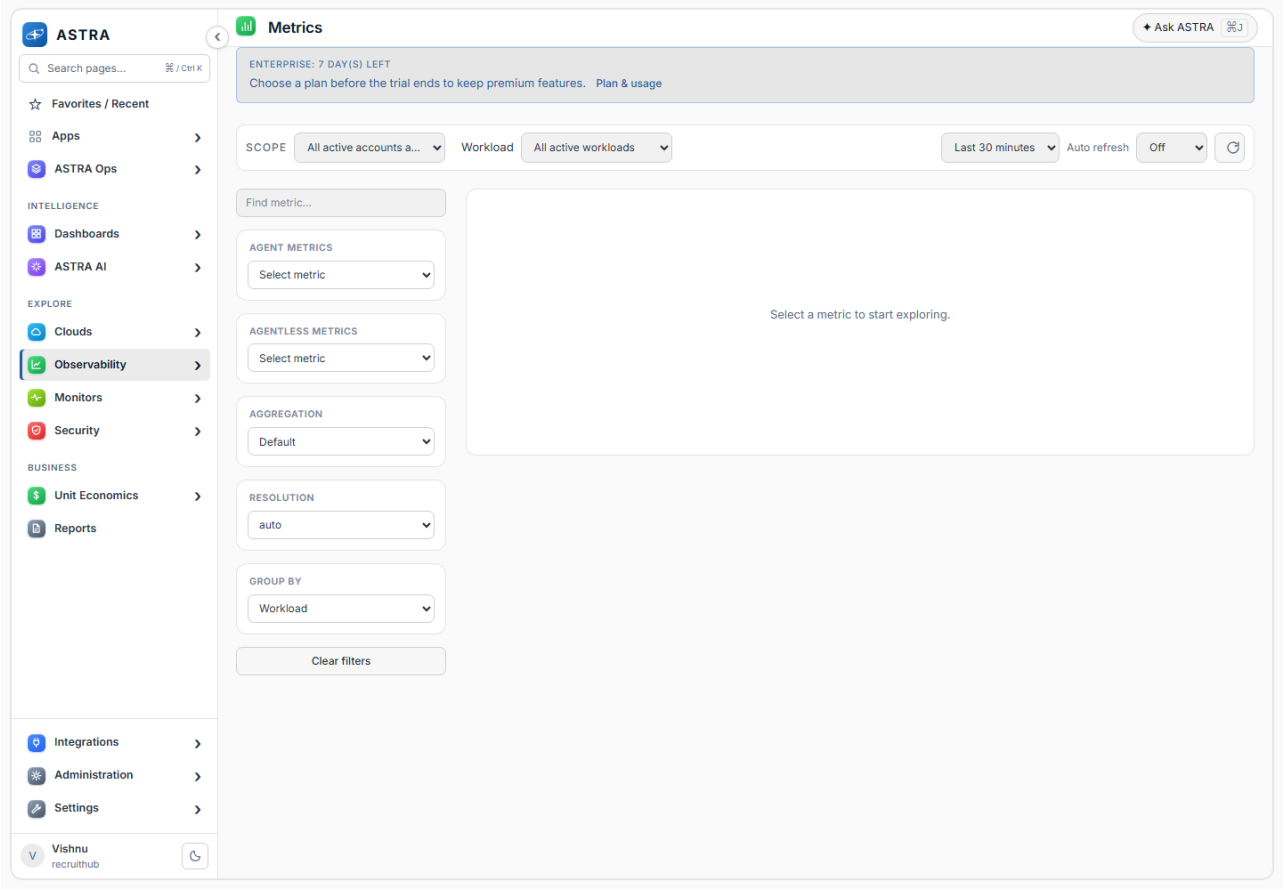

/observability/metrics

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.

HTTP errors captured: 0. Final route: https://astra.52.206.45.195.sslip.io/observability/metrics

Evidence: 24-observability-metrics.png

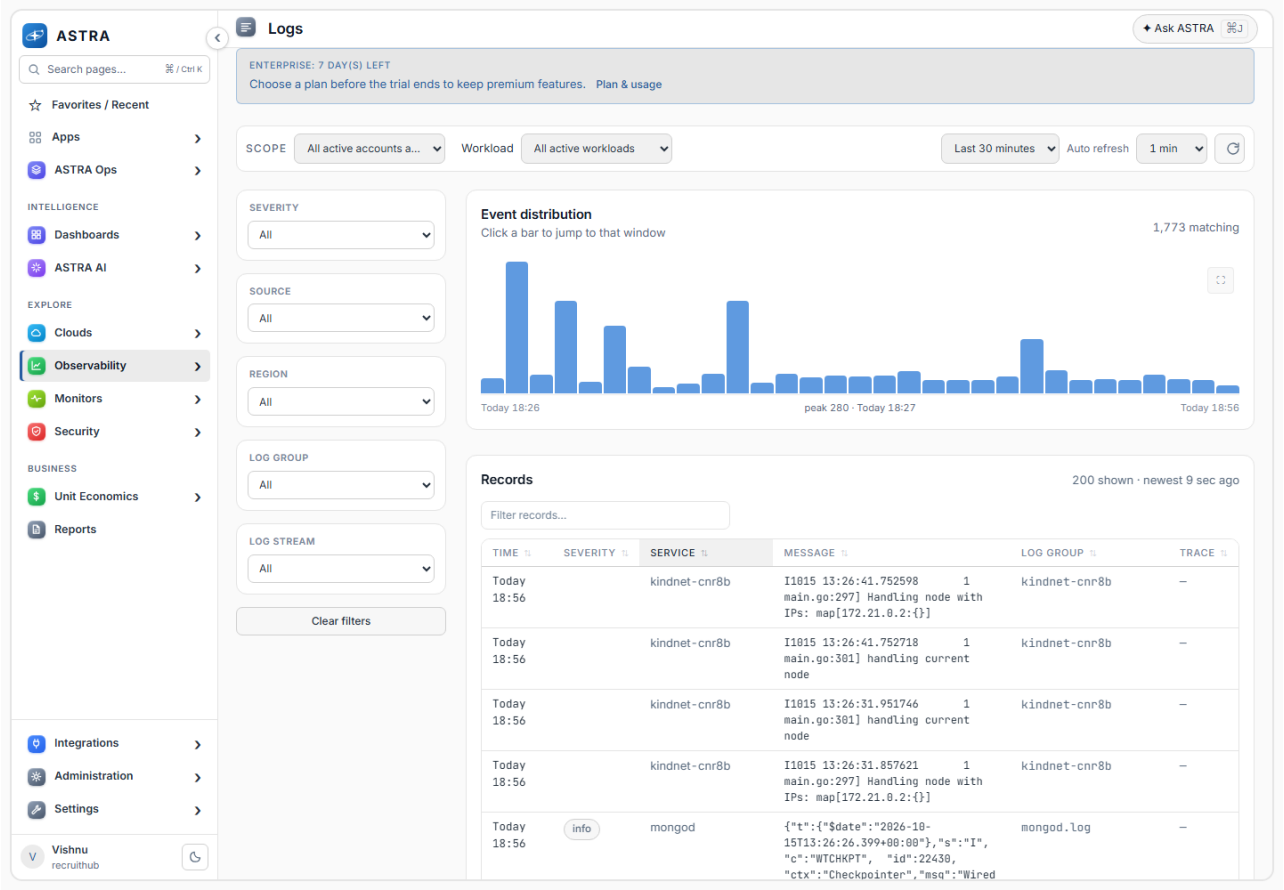

/observability/logs

Action: authenticated navigation to this route, followed by a short wait and screenshot. This is a page smoke check, not full functional validation.
